5. The Future
  - 5.1 Short-Term Vision: Continuing the Momentum
  - 5.2 The Dream: Gaming, Social Impact, and Real-World Integration
6. Conclusion: Joining the Smellow Journey

## 1. Introduction

At the heart of the Smellow Token (SMLO) lies more than just a digital currency—it is a story of passion, community, and a vision to create something unique in the world of crypto. It began with a love of art, crypto and blockchain technology, and it evolved into a vibrant ecosystem where individuals could not only explore the world of NFTs but also find themselves a part of something bigger.

Smellow's journey started with NFTs, but it soon grew into a larger movement—an idea that art, technology, and community could come together in an accessible, fun, and engaging way. The SMLO token was born from this vision, offering people a way to participate, grow, and prosper within the Smellow universe.

This white paper will guide you through the story of SMLO—from its humble beginnings to its current state as a thriving ecosystem, and finally, to its promising future. As you dive into this narrative, you will see how Smellow combines the power of blockchain with the energy of a passionate community, driven by a desire to make crypto accessible, fun, and rewarding for everyone.

## 2. The Beginning

### 2.1 The Spark of Inspiration

Every great project begins with a spark of inspiration. For Smellow, that spark came from a deep-rooted fascination with both the artistic world and the evolving landscape of blockchain technology. For years, I had been captivated by the power of crypto and the potential it held to revolutionize how people engage with money, art, and technology. But there was always one thing that concerned me—how intimidating and exclusive the world of cryptocurrency could feel to newcomers.

I wanted to change that and create something that would break down the barriers for people stepping into the crypto world. And that is when the idea for Smellow began to take shape—a project that would combine my passion for art with the opportunities provided by crypto, all while making it accessible for everyone.

### 2.2 From Art to Crypto: The Birth of Smellow NFTs

In May 2024, the Smellow NFT collection was born, representing the culmination of these passions. These NFTs are not just digital art—they are symbols of a greater idea. They were designed to be affordable and accessible, allowing more people to join the journey into the world of NFTs without feeling overwhelmed. Each piece of the collection carried a unique design, representing my desire to bring art and crypto together in one space, creating an intersection between creativity and technology.

Smellow's NFTs are hosted on the WAX blockchain, a platform known for its user-friendly and scalable approach to digital assets. For those interested in exploring or purchasing these distinctive pieces, the collection is available on AtomicHub. Here, collectors can browse and acquire Smellow NFTs, diving into a space where art and blockchain technology seamlessly intertwine.

AtomicHub:

## **2.3 Building the Community: Smellow's Fun and its Early Days**

With the increasing interest in Smellow NFTs, I realized that there was potential to build a thriving community around this idea. Thus, the Smellow's Fun Discord server was born. What started as a space for NFT enthusiasts quickly transformed into the central hub for everything related to Smellow. A simple collection of digital art evolved into something much larger—a growing movement of like-minded individuals who shared a love for both crypto and artistic expression.

This community was not just about discussing NFTs—it became a place for learning, sharing, and having fun together. It grew into an active environment where users could engage in staking, take part in games, join giveaways, and share their excitement about the crypto world. The concept of creating something that was both rewarding and educational became the foundation of Smellow's Fun.

The project's roots in the Discord community became its beating heart, where everyone could join regardless of their crypto knowledge or experience. The Smellow community started to expand, opening up new opportunities for even greater growth.

## **2.4 Solana: A Foundation of Trust and Security**

As Smellow's vision expanded, it became clear that a cryptocurrency was the next step. The SMLO token needed a foundation that could handle the demands of a growing community—something fast, secure, cheap and efficient. After careful consideration, Solana was chosen as the blockchain to support SMLO.

Solana's unique Proof of Stake (PoS) and Proof of History (PoH) technologies ensured that transactions were not only fast and scalable but also eco-friendly. This aligned perfectly with Smellow's values of sustainability and accessibility. Additionally, the low fees on Solana allowed users to trade, stake, and transfer SMLO tokens without worrying about high transaction costs.

The SMLO token was officially launched on August 10, 2024, marking a major milestone in the evolution of Smellow.

### **3. The Present**

#### **3.1 Smellow's Growing Ecosystem**

Today, the Smellow ecosystem has flourished into something far greater than just NFTs and a token. It has become a thriving space where community members actively participate and benefit from their involvement. Smellow's Fun remains the central hub for all things SMLO, providing a fun, interactive space where learning, financial growth, and engagement coexist.

The Discord community has grown significantly, bringing together people from all walks of life, united by a shared interest in digital art and crypto. Within this community, SMLO tokens are distributed through various means, including participation in events, staking rewards, and direct purchases. Consequently, Smellow has evolved into a place where users can grow both financially and personally.

Beyond Discord, the Smellow community has also established a strong presence on X (formerly Twitter) and Reddit, broadening its reach and engagement. These platforms serve as additional touchpoints for community interaction, updates, and discussions, reflecting Smellow's commitment to staying connected and expanding its network. The project is exploring further opportunities to reach new audiences and enhance its presence across various platforms, ensuring that Smellow continues to evolve and engage with its growing user base.

X: <https://x.com/Smellowsproject>

Reddit: <https://www.reddit.com/r/SmellowsToken/>

### 3.2 SMLO Tokenomics

At the core of Smellow's ecosystem lies the SMLO token, which is designed with community participation in mind.

- Token Name: Smellow
- Ticker: SMLO
- Max Supply: 1,000,000,000 SMLO
- Total Supply: 1,000,000,000 SMLO
- Decimals: 6
- Contract Address: cCpv5Z3nqKbKohYqgY7rxFebjMjvU7SBhwgYbCipump
- Blockchain: Solana
- Solscan:

<https://solscan.io/token/cCpv5Z3nqKbKohYqgY7rxFebjMjvU7SBhwgYbCipump>

### 3.3 Pump.fun and the Bonding Curve: A Dynamic Market Model

One of the standout features of SMLO is its integration with Pump.fun's bonding curve, a unique pricing mechanism designed to ensure fair token pricing and gradual price growth. The bonding curve adjusts the token's price based on supply and demand, ensuring a smooth price progression as more tokens are bought or sold.

This dynamic model provides stability for the SMLO market, enabling users to buy and sell tokens with confidence. Additionally, once the market cap reaches 85 Solana (equivalent to \$54,568 as of 17/09/2024), liquidity will be transferred to Raydium, a decentralized exchange (DEX), and subsequently burned, meaning the Iq will be locked. This process will enhance the token's visibility and increase its potential for growth.

### **3.4 Radium and Liquidity pools.**

As of January 6, 2025, SMLO is officially listed on the Radium Exchange. This marks an important milestone, introducing new opportunities for the project, including liquidity pools and greater decentralization.

A liquidity pool is a collection of tokens locked in a smart contract, allowing decentralized trading, lending, and other financial activities. It eliminates the need for traditional buyers and sellers by providing liquidity directly on decentralized exchanges like Radium.

By providing liquidity, you deposit a pair of tokens (such as SMLO and SOL) into a pool. In return, you earn a portion of trading fees and may receive additional rewards. However, there is a risk of impermanent loss or profit if token prices fluctuate significantly, depending on the type of pool.

buy SMLO on Radium:

<https://radium.io/swap/?inputMint=cCpv5Z3nqKbKohYqgY7rxFebjMjvU7SBhwgYbCipump&outputMint=sol>

Provide Liquidity on Radium pools:

<https://radium.io/liquidity-pools/?token=cCpv5Z3nqKbKohYqgY7rxFebjMjvU7SBhwgYbCipump&tab=standard>

With SMLO's listing on Radium, you can now help grow the ecosystem by trading and participating in decentralized finance activities!

#### **4. Staking Program**

The Smellow ecosystem offers a flexible staking program that rewards users with passive income for holding SMLO tokens. Every Saturday, users receive staking rewards based on the amount of SMLO they hold, encouraging long-term participation and providing a steady return on investment. Integrated seamlessly into Smellow's Fun Discord server, the program is designed for ease of use, with no complicated processes or lock-up periods you just keep SMLO in the wallet, meaning you are the one who owns the token and still can decide whenever and whatever you do with your tokens.

Users can withdraw their tokens at any time while still earning rewards for the duration they were staked. The program also provides additional perks for larger holders, such as higher rewards, exclusive Discord roles, providing access to exclusive spaces and additional benefits. This flexibility ensures that both new and experienced investors can benefit from the Smellow staking program, regardless of the size of their holdings. Rewards are conveniently distributed through Tip.cc, a built-in Discord wallet, allowing users to manage their tokens directly from the platform.

To put it a bit shorter and with some clear info, you can stake your SMLO tokens without staking them, it is more of a reward for holding the tokens. There are no lock ups, no sending to pools and no fixed earning. The amount of % you get in from the holdings depends on what role you have in the discord server (the higher the role the bigger the % APY) than the amount of tokens you receive each week is based on the % of your role and the amount of SMLO tokens you hold on that moment in your wallet. This makes our special staking program 100% controlled by yourself.

The staking rewards for now:

- Column 1: Minimum amount required to be able to receive rewards. (The higher the holding the more % APY you get)
- Column 2: Weekly staking reward (based on the exact holdings of the shown amount)
- Column 3: Percentage of the weekly reward based on the role
- Column 4: Yearly percentage

1	2	3	4
<b>Minimum holding</b>	<b>Reward</b>	<b>% per week</b>	<b>% per year</b>
500,000 SMLO	150 SMLO/week	0.0300%	1.56%
1 million SMLO	320 SMLO/week	0.0320%	1.664%
5 million SMLO	1,900 SMLO/week	0.0380%	1.976%
10 million SMLO	4,500 SMLO/week	0.0450%	2.34%
15 million SMLO	7,800 SMLO/week	0.0520%	2.704%
20 million SMLO	11,500 SMLO/week	0.0575%	2.99%
25 million SMLO	15,000 SMLO/week	0.0600%	3.12%

**Note:** Please be aware that the staking rewards for SMLO may be adjusted in response to fluctuations in the market price. To ensure fairness and sustainability, the program is designed to adapt, which means that future reward rates could be modified to align with market conditions. This flexibility aims to maintain a balanced and attractive staking experience for both current and future participants. Occasionally, holders will be asked for their input on certain decisions, offering a chance to share their thoughts and help shape aspects of the project's direction.

## 4. The Future

### 4.1 Short-Term Vision: Continuing the Momentum

Smellow's journey is just beginning, with exciting developments on the horizon. In the short term, the roadmap focuses on expanding the staking program to offer more benefits for the community. There are plans to host larger and more engaging community events to foster interaction and growth. New partnerships are actively being pursued to broaden the network and enhance the project's reach, demonstrating commitment to supporting the growth and success of both Smellow and its partners.

Additionally, efforts are being made to refine and enhance the tools and utilities available within the Discord server. This includes improvements to the price-tracking bot and other features to offer a more streamlined and enjoyable experience for users. These upgrades aim to keep the community actively involved and support the continued expansion of the SMLO ecosystem.

By concentrating on these areas, the goal is to make Smellow not just a platform for financial growth but also a vibrant, rewarding, and enjoyable space for all participants. The aim is to create an environment where every member feels valued and engaged, ensuring that Smellow continues to thrive and evolve as a leading community-driven project in the crypto and art worlds.

## **4.2 The Dream: Gaming, Social Impact, and Payment Integration**

Looking ahead, Smellow has a vibrant and ambitious vision for the future.

One of the key goals is to integrate SMLO into an exciting Smellow-themed game. This immersive experience will allow players to earn tokens through engaging gameplay, blending entertainment with cryptocurrency in a unique way. Players will also have the option to spend SMLO within the game, enabling them to upgrade and progress faster while still having the opportunity to earn more tokens as they play.

In addition, proceeds are directed toward supporting charitable causes and promoting sustainability. There is also potential to establish a Smellow charity focused on aiding underdeveloped areas. The creation of a nonprofit organization (NGO) could further introduce individuals to the world of crypto while supporting these vital causes and improving the lives of those in need.

Finally, there are plans to expand SMLO's role as a widely accepted payment method, integrating it into everyday transactions. This expansion aims to enhance SMLO's practical utility, making it a valuable asset in the broader economic landscape. Additionally, educational courses could be developed to help individuals understand how to use crypto, convert money into SMLO and other cryptocurrencies, and back again. There is also the potential to start a business that accepts fiat money, SMLO, and crypto as payment methods, further embedding SMLO into daily life and supporting its growth.

Through these efforts, Smellow aspires to create a lasting legacy, merging innovation, community, and positive change in the evolving world of cryptocurrency.

## 5. Conclusion: Join the Smellow Journey

The Smellow Token (SMLO) represents more than just a cryptocurrency; it embodies a vibrant and growing community. Built on the Solana blockchain, Smellow offers a dynamic platform where digital art enthusiasts and crypto aficionados converge. Through its engaging Discord community and the innovative integration of NFTs and tokens, Smellow creates a unique space for users to participate, learn, and grow.

With a focus on fostering personal and financial growth, Smellow invites everyone—from artists and crypto enthusiasts to those new to the space—to be part of this exciting journey. As SMLO transitions to new platforms and implements strategic innovations like token burns on Raydium, it promises to enhance both the value and the reach of the token.

By joining Smellow's Fun, you become part of a movement that seamlessly merges art, technology, and community, paving the way for a richer and more rewarding experience. Embrace the opportunity to be involved in a project that is set to redefine the intersection of creativity and cryptocurrency.
